ProCore Mobile App

Enable Charger Configuration and Management via Mobile App

Industry's First Electric Forklift Charger Mobile App

The ProCore Charger Mobile App is the industry's first mobile application to enable charger configuration, programming, and data downloads from your ProCore fleet directly to your smartphone. What used to be a time consuming and complicated endeavor can now be done with ease in just a few minutes.

No more messing around with bulky laptops or data cables. Quickly set up new units, program, troubleshoot, make changes to your fleet and more. The mobile app is compatible with both ProCore and ProCore Edge.
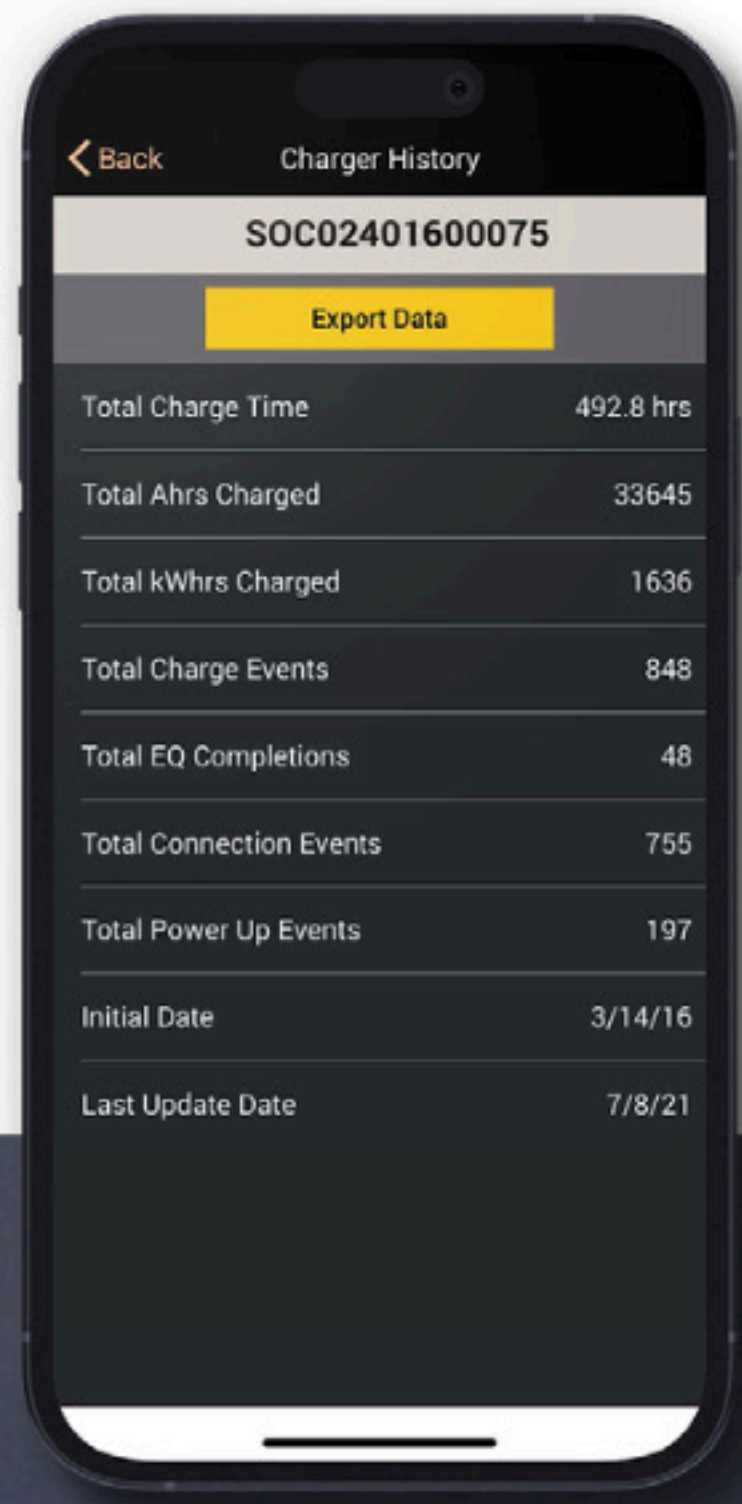

Key Features

80 Various Charge Profiles
