

ACCESSORIES

THE TEAM BEHIND THE POSICHARGE™ SOLUTIONS SERVES MORE THAN 10,000 VEHICLES WORLDWIDE.

FLEET MANAGEMENT

Battery Rx™: Battery care system featuring advanced battery monitoring, wireless communication, and data management software

- Real-time battery management, maintenance scheduling, preventive care, and warranty compliance tracking
- Hands-free alerts that early issue detection
- Water level detection and automatic battery watering
- Ability to make a “smart-charge” fleet out of any PosiCharge™ configuration

PosiNET® Systems: Full suite of battery and charger data analysis tools

- PosiNET Web – Internet-based application service provider (ASP) tool
- PosiNET Desktop – Single-charger download analysis tool

CABLE MANAGEMENT

Extended and Custom Modular Charge Cables

- 20ft, 25ft, 30ft charge cables
- Modular cable design for easy replacement
- Custom cables with non-standard connectors also available

Charger Stand Kit with Pogo Style Cable Handler

- Keeps cables off floor for a clean and safe operation
- Provides platform for mounting charger accessories

MORE POWER TO YOU.

BATTERY MANAGEMENT

Port Splitter: Makes two charge ports out of a single charging station

- Ideal for a staggered break schedule or spare truck fleet
- Lowers the cost of implementing fast charging

Plug-n-Charge Kit: Single action plug-in for in-vehicle battery charging

- In-vehicle battery charging without disconnecting cables from the truck
- Adapt the fleet to in-vehicle charging without truck modifications
- Allows clean use of in-vehicle charging with leased vehicles
- Auto-disconnects battery from controller when charger is plugged in
- Compatible with Cooling Fan
- Watering port bracket provided
- Eliminates the need for both truck and battery DIY kits

Cooling Dock: Plug-n-Charge, Battery Cooling and Watering in one box

- Attaches to the side of battery, eliminating need for truck modifications for thermal management
- Modular and self contained
- Low profile design fits many counterbalance trucks

Cooling Fan: State-of-the-art thermal management for battery fast charging

- Ideal for heavy use trucks or big batteries that need the fastest charge
- Low profile design fits easily in most truck battery compartments
- Requires vented tray batteries

Auto Watering Kit: Single point, charger controlled automatic battery watering system

- Insures battery watering control at the right time, and to the right levels
- Charger waters weekly during EQ cycle and prevents overfilling
- Gravity feed via holding tank provides the most reliable watering solution
- Requires Accessory Driver Kit (ADK)

Stack Lights: 3 color stack lights provide clear visual of charge status

- Green = charged, yellow = charging, red = not charging or fault
- Requires Accessory Driver Kit (ADK)

DIY Kit: Parts and instruction manual to convert your truck for fast charging

- For local qualified truck repair dealers, including easy instructions for performing standard conversions
- Includes Fast Charge Battery Cable Kit – Hardware and cabling to connect battery to fast charger (Requires fast charge configured battery)
- Includes Fast Charge Truck Kit – Hardware and cabling to adapt truck for fast charging
- Usually requires both kits

Accessory Driver Kit (ADK): Power supply and wiring to power state-of-the-art charger accessories
