

Fast Charge Truck & Battery Accessories

Many electric material handling vehicles are not fast charge ready. PosiCharge provides three levels of fast charge conversions to meet your specific needs. PosiCharge has the necessary kits to make the conversion to fast charging

easy with kits or assemblies that adapt both truck and battery for fast charging. Each kit comes with documentation for installation and the work can be done on site or at your local dealer.

- DIY Kit:** Parts and instruction manual to convert your truck for fast charging. Your local qualified truck repair dealer can perform the conversion. Usually requires both battery and truck kit.
- Fast Charge Battery Cable Kit – Hardware and cabling to connect battery to fast charger. (Requires fast charge configured battery)
 - Fast Charge Truck Kit – Hardware and cabling to adapt truck for fast charging

- Plug-n-Charge Kit:** Modular assembly eliminates need to modify truck for fast charging and simplifies operator use.
- Adapt battery and lift truck without modifying truck
 - Disconnects battery from controller when charger is plugged in
 - Compatible with Cooling Fan
 - Watering port bracket provided
 - Eliminates the need for both truck and battery DIY kits

- Cooling Fan:**
- Cooling Fan Assembly for heavy usage trucks, use with or without Plug-n-Charge Kit
 - Requires vented tray batteries
 - Significantly improve charge acceptance for heavy usage trucks
 - Low profile design fits easily in most truck battery compartments

- Cooling Dock:**
- Eliminates need to modify truck
 - Modular and self contained
 - Plug-n-Charge, battery cooling and watering port in one box
 - Low profile design fits many counter-balance trucks
- BMID2 – Enhanced BMID** with real time data storing and all features of standard BMID:

- Water Level Detection
- Integrate charge and discharge kWhs and Ahs
- Vehicle utilization statistics (Last 60 days)
- Charger independent data stored in BMID2
