

SYSCO Operating Companies boost productivity with PosiCharge

SYSCO benefits from increased productivity by utilizing PosiCharge motive power systems throughout the US. For over four years, PosiCharge has been providing SYSCO Operating Companies with a turn-key, automated solution for electric fleet management, lowering costs and increasing productivity. Here are some of the benefits of fast charging with PosiCharge.

PosiCharge Motive Power Systems deliver instant savings and productivity gains:

- Achieve 12 month ROI in existing locations
- Average savings of \$350,000 in building costs for new facilities, compared to conventional charging
- Universal fast chargers work on all types of electric vehicles: reach trucks, sit down trucks, tuggers and pallet jacks
- Optimize driver activity and reduce cross-facility traffic
- Maximize battery life, often exceeding typical battery warranties

SVS80: 8kw, 200A fast charger for pallet jacks

PosiCharge integrated solutions go beyond just fast charging:

- **PosiNET Data Products and Services**
PosiNET is a comprehensive fleet management software package that produces useful, accurate, real-time information for maximizing fleet performance.
- **Automatic Watering Systems**
A hands-free single point watering system that automatically waters batteries when they need it - significantly reducing maintenance costs.
- **Accessories**
SideKick™ fast charge "docking stations" eliminate the need for truck modifications and deliver active cooling to help with high usage applications.

PosiCharge delivers turn-key battery charging at the following SYSCO locations:

- SYSCO Food Services of Ventura, Inc.
- SYSCO Food Services of Las Vegas
- SYSCO Food Services of Portland, Inc..
- Nobel/SYSCO Food Services (Denver)
- SYSCO Food Services of Spokane
- SYSCO Food Services of Arkansas
- SYSCO Roberts-Lincoln, IL
- SYSCO Selma, NC
- SYSCO Arizona
- Fresh Point - A1A Produce

PosiCharge installation services helps design the optimum, cost-effective solution based on a facility's unique needs:

- Project management
- Custom installations
- Operator training
- Start-up support
- Post-sales service and support

Custom Installations include: mounting chargers on the floor, on stands, on walls, between dock doors, in remote locations, and virtually anywhere to maximize the productivity benefit.
